4. INSTALLATION PROCEDURE	
	<p>1. DRILLING</p> <p>Check the concrete base is compacted and porosity is insignificant. Suitable for dry, wet and flooded drill holes. Use drill in hammer mode. Drill to the specified diameter and depth values.</p>
	<p>2. BLOW AND CLEAN</p> <p>Clean the drill holes completely of dust and fragments. Use air pump and brush.</p>
	<p>3. INSTALL</p> <p>Insert the anchor in the hole until the red ring mark is flat with concrete surface. Use hammer in case of need; DOMTA tool could be used alternatively. The installation could be done through the fixture baseplate.</p>
	<p>4. APPLY THE TORQUE</p> <p>Apply nominal installation torque using a torque wrench. Once installed it can be verified the total length of the anchor though the letter on bolt tip.</p>

5. RESISTANCES
